# Introduction of library management system report

## ELEMENTARY TEACHER

Elementary Teacher  
This is a web based application and only a registered user can access the application. It also has a facility of admin login through which the admin can monitor the whole system. Librarian is able to search record by using few clicks of mouse and few search keywords thus saving his valuable time. Student login page where student can find books issued by him/her and date of return. Using the library management system, user can also maintain the late fine of library member who return the issued book after the due date. Users can search for books and renewal books online. Another major disadvantage is that to preparing the list of books borrowed and the available books in the library will take more time, currently it is doing as a one day process for verifying all records. Library management system is a project which aims in developing a computerized system to maintain all the daily work of library. Books and student maintenance modules are also included in this system which would keep track of the students using the library and also a detailed description about the books a library contains. Overall this project of ours is being developed to help the students as well as staff of library to maintain the library in the best way possible and also reduce the human efforts. This project has many features which are generally not available in normal library management systems like facility of user login and a facility of teachers login. The user is able to generate different kinds of reports like lists of students registered, list of books, issue and return reports. Using this system user can issue book to the library member, maintain their records, and can check how many books are issued and how many books are available in the library. This system provides separate interface and login for librarian, students and faculties. This system contains list of all the books. Proposed system is an automated Library Management System. Management system is developed to automate the task of entering the records of new book and retrieving the details of book available in the library. Library is place where all kind of books are available. Request column for librarian for providing new books. Through our software user can add members, add books, search members, search books, update information, edit information, borrow and return books in quick time. The aims and objectives are as follows: 2. Online book issue. A teacher login page where teacher can add any events being organized in the college and important suggestions regarding books. Module Description: Admin Module: Library Management System is designed to help users maintain and organize library. It is used by librarian to manage the library using a computerized system where he/she can record various transactions like issue of books, return of books, addition of new books, addition of new students etc. Using this system librarian can generate various reports such as student report, issue report, teacher report and book report. Improvement in control and performance 3. whenever library member wish to take a book, the book issued by the library authority will be check both the book details as well as the student details and store it in library database. In the proposed system, we assume that each member will be having a identity card which can be used for the library book issue, fine payment etc. A search column to search availability of books. With this computerized system there will be no loss of book record or member record which generally happens when a non computerized. All these modules are able to help librarian to manage the library with more convenience and in a more efficient way as compared to library systems which are not computerized. PROJECT AIMS AND OBJECTIVES 1. The existing system all transactions are done manually, So taking more time for a transaction like borrowing a book or returning a book and also for searching books. Using this system student can log in online system and after logging in to their accounts can see list of books issued and their issue date and return date. They can recommend for new books just by sending messages to the library from anywhere in college. The library can modify the database. The system is designed to address current problems and library problems. The system can add users, validate users. 4. A separate column for digital library. Library Management System Project 3. ONLINE LIBRARY MANAGEMENT SYSTEM Submitted By: M R S Swaroop In partial fulfillment for MSC degree award Computers in University of east London INTRODUCTION The primary purpose of library management system is to organize and manage library tasks. Using the library management system, students can also request that the library add new books by completing the book request form. After the computer system is implemented less human is needed to maintain the library, thus reducing the overall cost.

## PROJECT MANAGER COVER LETTER SAMPLE

Project Manager  
Cover Letter Sample  
Dear Sir,  
I am writing to you regarding the position of Project Manager at your organization. I have been following your company's progress and I am impressed by the work you are doing. I believe that my skills and experience make me a strong candidate for this position. I have a degree in Project Management and I have worked for several years in various roles related to project management. I have a proven track record of successfully managing projects of all sizes and I am confident that I can bring the same level of expertise and dedication to your organization. I am a highly motivated and organized individual who is always looking for ways to improve efficiency and reduce costs. I am also a team player who is always willing to help others and to take on new challenges. I would be happy to discuss my qualifications further and to answer any questions you may have. Thank you for your time and consideration. Sincerely,  
[Name]
